

THEODORE ROOSEVELT CONSERVATION PARTNERSHIP

2020 ANNUAL REPORT

How Conservation Was 2020's Silver Lining

WHEN A NATION UNDER LOCKDOWN TURNED TO THE OUTDOORS, THE TRCP WAS READY

OUR MISSION

To Guarantee All Americans Quality Places to Hunt and Fish

IN MANY WAYS, THE THEODORE ROOSEVELT Conservation Partnership was humbled and fortunate to flourish in 2020, when so many Americans and their businesses were rocked by the economic downturn associated with the COVID-19 pandemic. Our team worked hard, made critical adjustments quickly, and took care of our families and each other, but we also benefited from what turned out to be the silver lining of a year marked by tragedy:

Americans flocked to nature—for respite, entertainment, and connection. This included many people who took up hunting and fishing for the very first time. As a result, conservation has become more important, and relevant to a broader audience, than ever.

This comes as no surprise to those of us who work in conservation every day. Even as our country seemed so deeply divided, we saw firsthand the continued ability of decision-makers to find common ground and pass legislation to improve fish and wildlife habitat, hunting and fishing access, and the outdoor recreation economy.

Conservation was a unifying force, and the TRCP and its partners are proud to have played a role in advancing solutions-oriented policy.

Among the many achievements that the TRCP celebrated last year (see p. 3) was passage of the groundbreaking Great American Outdoors Act and America's Conservation Enhancement Act, which made long awaited investments in our public lands and essential habitat programs. Our team partnered with an industry leader to continue identifying inaccessible public lands, this

time on half a million acres east of the Mississippi, and then worked with lawmakers to introduce legislation that would help fix this access challenge. Our coalition reformed menhaden management and took a first step toward reducing harvest of this critical forage fish in the Atlantic. We built a diverse coalition of groups aligned to combat climate change and launched a TV ad on FOX News calling on the Trump Administration to stop the Pebble Mine in Alaska, which was blocked one week later.

These efforts and many more will help guarantee all Americans quality places to hunt and fish in 2021 and beyond. But we couldn't have done this work without your help—thank you.

For nearly 20 years, the Theodore Roosevelt Conservation Partnership has brought people together, built coalitions, and advanced conservation. We hope this benefits you and your family in the same way that your ongoing support buoys our efforts.

Sincerely,

Whit Fosburgh
President and CEO

Jamie A. Baker IV
Board Chair

POLICY ACHIEVEMENTS

The America's Conservation Enhancement Act Passes

1

2

3

4

Reauthorizes the North American Wetlands Conservation Act at **\$60M annually** for the next five years.

Invests **\$90M** in Chesapeake Bay conservation efforts that benefit fish and waterfowl.

Creates a new **chronic wasting disease task force** to oversee federal response to this wildlife crisis.

Codifies and invests in habitat improvements through the **National Fish Habitat Partnership**.

Major COVID-Relief Bill Contains Investments in Conservation

\$1.9 BILLION

included for our nation's public lands

Lawmakers Introduce the MAPLand Act

The Modernizing Access to our Public Lands Act builds on one of TRCP's signature issues—unlocking inaccessible public lands—by providing the funding necessary over several years for our national land management agencies to digitize

paper maps, easement data, and recreational-use regulations. The bill was the subject of a Senate committee hearing in 2020 and has good momentum already this Congress. Passage of MAPLand is one of our top 2021 priorities. (See p. 10)

Fish: RIMLIGHT MEDIA; Man With Phone: USFWS

THE GREAT AMERICAN OUTDOORS ACT PASSES

\$900 MILLION

annually secured for the Land and Water Conservation Fund

Invests **\$9.5 billion** to address the deferred maintenance backlog on National Park Service, U.S. Forest Service, U.S. Fish and Wildlife Service, and Bureau of Land Management public lands

INCLUDES A MINIMUM OF **\$15 MILLION** TO BE USED EACH YEAR TO EXPAND PUBLIC LAND ACCESS

MAJOR WIN FOR IMPORTANT FORAGE FISH

The Atlantic States Marine Fisheries Commission adopts a **new ecological management system** for menhaden and reduces the industrial harvest quota by 10 percent to rebuild the striped bass fishery on the East Coast. It's an important step in curbing harmful menhaden reduction fishing, something recreational fishing and conservation groups have been working on for more than 20 years.

Hunters and Anglers Push Back on Misuse of \$5 Million in Chronic Wasting Disease Response Funding Meant for the States

WATER RESOURCES DEVELOPMENT ACT PASSES

WITH BENEFITS FOR FISH, WATERFOWL, COASTAL HABITAT, AND WATER QUALITY IN THE EVERGLADES

THE PEBBLE MINE PROPOSAL IS BLOCKED

ORGANIZATIONAL ACHIEVEMENTS

“This report highlights the creative ways landowners and agencies are working together to increase access to the outdoors.”

— TALDI HARRISON,
GOVERNMENT
AFFAIRS MANAGER,
REI CO-OP

REPORT: The Little-Known Farm Bill Program That Opens Walk-In Access on Private Land

Deer: NATIONAL DEER ASSOCIATION; Fishing: LAEL JOHNSON; Dog: RIMLIGHT MEDIA

Turkey Hunters: KYLE MLYNAR; Couple: TIM DONOVAN

The TRCP partnered with REI to release a report on the nation’s most successful private lands access initiative—the Voluntary Public Access and Habitat Incentive Program. Our report showcases how 15 states are using federal Farm Bill money to increase opportunity for hunters, anglers, and other outdoor recreationists with the help of private landowners.

Launched 41-Group Conservationists for Climate Solutions Coalition

TRCP Report Highlights Four Successful Coastal Restoration Projects Ten Years After Gulf Oil Spill

#ResponsibleRecreation Campaign Educates Hunters and Anglers on Following COVID Best Practices While Enjoying the Outdoors

This digital campaign reached more than **138 MILLION PEOPLE**

Acres of Inaccessible Public Lands identified:

560,000

The TRCP partnered with digital mapping company onX to release three reports detailing inaccessible public lands in nine states east of the Mississippi. This groundbreaking data builds on two previous reports which shine a light on the public access crisis in America. In total, the TRCP has detailed 16.43 million acres of landlocked public land in 22 states.

FIRST-EVER VIRTUAL FUNDRAISING EVENT BROUGHT TOGETHER MORE THAN 1,400 TRCP SUPPORTERS

Conservation achievement awards were given to Congressmen **Garret Graves (R-La.)** and **Marc Veasey (D-Texas)** and business leader **William J. Michaelcheck**

From the Field

HERE'S WHAT
OUR FIELD TEAM
ACCOMPLISHED
FOR CONSERVATION
IN 2020

John Cornell
pushed for conservation safeguards on 1.4 million surface acres of public lands in a new management plan for northeastern **New Mexico**, focusing his efforts on conserving mule deer migration corridors and habitat in the San Juan Basin.

Derek Eberly
led a very engaged TRCP membership in **Pennsylvania**, successfully advocating for the designation of dozens of Wild Trout and Class A streams and blocking a legislative push to borrow from conservation accounts to settle the state deficit.

Carl Erquiaga
and the TRCP's partners in **Nevada** pushed the Department of Wildlife and BLM for conservation policies to safeguard the sagebrush ecosystem and big game migration corridors. He continues to build support for the Ruby Mountains Protection Act, a top priority for 2021.

Nick Dobric
advocated for conservation provisions in **Wyoming** Governor Mark Gordon's executive order on big game migration corridors, and he's stayed engaged throughout the year to ensure these policies are implemented successfully.

John Gans
supported the TRCP's efforts to push for better management of menhaden in the Atlantic, rallying sportsmen and women from the **Northeast** around the need for deeper cuts to the industrial fishing quota to keep more of these forage fish in the water.

Scott Laird
led a years-long campaign on behalf of **Montana's** hunters and anglers that resulted in the creation of the nation's first Backcountry Conservation Areas, which were included in the BLM's revised plans for the Missoula and Lewistown field offices.

Rob Thornberry,
entering his sixth year at the TRCP, will build on last year's efforts to amplify the voices of sportsmen and women in public land planning for more than 7.4 million acres of central and eastern **Idaho** and wildlife migration across the state.

Madeleine West
opened TRCP's new Denver office before COVID stay-at-home orders were put into effect last year. She facilitated the success of the field team **across the West** and continues to work with partners and agencies to safeguard big game migration corridors.

Jen Leahy
became the TRCP's first full-time field representative in **Alaska** last year, and she hit the ground running—rallying hunters and anglers to oppose conservation rollbacks in the Tongass National Forest and pushing for strong conservation in the Central Yukon public land planning process.

Michael O'Casey
has worked to build a robust coalition of sportsmen's and women's organizations to advocate for the protection of wildlife habitat within **Oregon's** Owyhee region. In 2020, his role was expanded to increase TRCP's influence on public lands conservation in **Washington** state.

CHANGE IN NET ASSETS **\$1,810,556**

The Theodore Roosevelt Conservation Partnership is a 501(c)(3) non-profit organization that takes great pride in its financial accuracy, transparency, and accountability. The TRCP uses every dollar as efficiently as possible to honor the generosity of our donors. In 2020, **the TRCP spent 80 percent of all contributions directly advancing conservation, keeping our overhead at a minimum.**

As a testament to the integrity of TRCP's work, we have received the highest possible rating from Charity Navigator for six years in a row, a Platinum Seal from Guidestar, and the top-tier rating from the Better Business Bureau Wise Giving Alliance.

Creating conservation jobs

With millions of Americans still out of work as a result of the pandemic, the TRCP is pushing decision-makers to craft economic recovery legislation that invests in conservation programs with a track record of creating jobs. Wetlands restoration and coastal habitat improvements are among our specific recommendations.

Our Top Seven Priorities for 2021

HERE'S WHAT IS AT THE TOP OF OUR MUST-DO LIST FOR POLICYMAKERS

Conserving migration corridors

Building on the momentum from recent executive orders on migration corridor conservation and advances in GPS technology that allow us to know exactly where big game animals travel, the TRCP will continue to push for updates to federal land-use plans and policies that account for the importance of these seasonal habitats to elk, mule deer, and antelope.

Combatting chronic wasting disease

More than half the country has been touched by a wildlife disease that threatens the future of wild deer, hunting, and conservation funding—all while more people are newly interested in harvesting their own venison. In 2021, we are pushing for comprehensive legislation that funds strong state CWD response plans for better research, testing, and management.

Carp: Pronhorn: USFWS; Deer, Hunters: NATIONAL DEER ASSOCIATION

Doubling conservation investments in the Farm Bill

The Farm Bill empowers farmers and family forest owners with the technical and financial assistance they need to enhance soil health, water quality, wildlife habitat, hunting and fishing access, and the land's ability to sequester carbon. The TRCP is laying the groundwork for doubling investment and growing enrollment in Farm Bill conservation programs in the next five-year bill.

Passing the MAPLand Act

The Modernizing Access to our Public Lands Act (see p. 3) has already been reintroduced this Congress with strong bipartisan support. We'll be pushing to get it over the finish line so that hunters and anglers can confidently and responsibly plan their next public lands adventure.

Improving menhaden management in the Gulf

The TRCP has expanded its menhaden campaign from the Atlantic to the Gulf, partnering with other leading voices in recreational fishing to urge fisheries managers to protect sensitive ecosystems from industrial fishing. In 2021, we will push for an ecological management model for menhaden and support state legislation that prioritizes menhaden conservation.

Advancing natural climate solutions

As we work with an administration eager to engage in the climate fight, the TRCP's focus will be ensuring hunters and anglers have a seat at the table and harnessing the power of natural systems—in other words, habitat—to remove and sequester carbon from the atmosphere. This approach will help build more resilient communities AND fish and wildlife populations.
